1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 24-28 are rejected under 35 U.S.C. 102(e) as being anticipated by Hoffberg.

Hoffberg teaches the claimed method for collecting traffic information including: tracking the location of a vehicle (2, column 33, line 40 to column 34, line 35), comparing the vehicle's speed on a road segment to a stored speed of that segment (column 20, lines 15-37), transmitting traffic information (5, 12, and 14), and server (25).

2. The Horvat patent is cited to show comparing a vehicle's speed on a road segment to a stored speed of that segment (Abstract).

The Mardirossian patent is cited to show comparing a vehicle's speed on a road segment to a stored speed of that segment (Abstract).

The Hoshino et al patent is cited to show comparing a vehicle's speed on a road segment to a stored speed of that segment (Figure 31, column 30, lines 34-41).
